

Your Data . Your Way

Store your data, perform complex analytics and create and share real-time dashbaords

Get back to working on your business, while we get to working on your data

BlobCity is a data platform with all in one capabilities. It is a NoSQL database, an AI engine, an analytics framework, a self-service visaulisation and dashboarding tool, and it allows you to load stored procedures that can extend its built-in functionality. This is the unified data platform you wished was created before you got into all the data mess.

Load your data, anyway you like

Drop in your files

Simply upload your files over FTP and we will import them. We support a variety of formats.

Integrated Visualisation & Real-time Sharable Dashboards

In just a few clicks you can create dashboards over you data in BlobCity. Simple drag drop functionality for creating dashboards. Your dashboards are automatically updated when your data is updated or you insert new data in the tables. Your real-time dashboards can be shared with others and also be embedded in your web-pages. Feature available by default for all cloud users.

[US Census Dashboard \(sample\)](#)

Multi-model is not “multi” anymore

Record 1 - JSON
{ "name": "Tom", "age": 45 }

Record 2 - XML
<person>
 <name>Alice</name>
 <age>34</age>
</person>

Record 3 - CSV / Excel
name, age
Henry, 56

insert →

name	age
Tom	45
Alice	34
Henry	56

BlobCity automatically converts your data from any format into tabular data for SQL based queries and vice versa. You could load all data in JSON and export the same as XML or query data from diverse formats as SQL; or export data from any format into JSON. This is a first of a kind capability, found in no other database. Multi-model handling at it's best!

To take or not to take, that is the question

- All users start free. First 100MB free for life.
- Pay for what you use beyond the free tier
- FTP access to upload data files
- Readily load data from 750+ apps (Zapier)
- Integrated visualisation and self-service dashboards
- Stored procedures for doing advanced analytics, AI & ML
- No credit card required

100MB free
then \$10 / GB / month

Your Datastore

All the data you load into BlobCity gets stored in a datastore. Inside the datastore runs our amazing data handling engine that allows you to do magic with your data. You don't have to understand what a datastore is, but it is important you give a name to your datastore.

XXXXX - Name once set cannot be changed

Visualisation & Dashboards

Create and share real-time dashboards with your integrate visualisation and dashboarding capabilities. Our visualisation is powered by Tableau.

Your account comes with sample dashboards we have created for you over public data sets. You could consume these and could make your own.

Visualise

visual.blobcity.com

To make dashboards over your data, you will first have to load your data into BlobCity. All data you load into BlobCity is automatically synced to visualisation tool and kept upto date with any updates and inserts you do on your datastore.

Whether you are a free user or paid customer, You have access to full visualisation and dashboarding capabilities at no additonal costs.

FTP Data Management

Enable FTP if you would like to upload your data into BlobCity or download data present in BlobCity over FTP. This is also currently the only non-api based access to your data. FTP is also the only way to load your custom code.
